

# CV Declan Greenwell

---

## Personal Summary

**Email** [declan.greenwell@gmail.com](mailto:declan.greenwell@gmail.com)

**Website** [mrsixtythree.github.io](https://mrsixtythree.github.io)

I am a 23-year-old Computer Science student at the University of Wollongong, majoring in Game and Mobile Development. Currently, I work as a Peer Assistant Leader at UOW College, where I provide academic support, mentoring, and instruction in key IT and computer science concepts. Through my studies and projects, I have developed strong programming skills in languages including C, C#, C++, Java, Python, HTML, CSS, JavaScript, MySQL, and Kotlin.

My major has afforded me hands-on experience in game and app development using tools such as Unity, Android Studio, and GitHub, alongside a solid foundation in UI/UX design. Outside of my formal education, I enjoy working on game development projects, where I apply my skills in both technical programming and creative design. I am eager to bring my expertise and enthusiasm to roles in the tech industry, especially in software and game development.

In my spare time, I also enjoy cooking, reading and writing books, spending time by the ocean, traveling, and playing with my dog Manggo (named with two g's intentionally – say 'mango' and tell me there shouldn't be two g's).

## Work Experience

## **Volunteering**

I volunteered as a coach for Albion Park Football Club's junior teams, leading the U15 squad in 2022 and the U16s in 2023. My role involved planning training sessions, fostering teamwork, and developing players' skills and confidence on the field. Beyond coaching, I also contributed to the club in various volunteer capacities, supporting events and helping maintain a positive community atmosphere.
